		Notice Published: 12/22/2017	Public Hearing: 2/8/2018	Approval by CARB: 11/21/2018	To OAL for review: 12/21/2018		
Summary: Staff will present for Board consideration: 1) new, more stringent Greenhouse Gas (GHG) emission standards for medium- and heavy-duty vehicles and trailers that largely align with the federal Phase 2 GHG standards, and 2) amendments to the Tractor-Trailer GHG regulation to harmonize with the Phase 2 trailer standards. The new GHG emission standards (California Phase 2 regulations) would establish new GHG emission standards for trailers, amend existing regulations to establish more stringent GHG standards applicable to tractors, vocational vehicles, pick-up trucks and vans, and medium- and heavy-duty engines, and amend requirements for glider vehicles, glider engines, and glider kits. The proposed new regulations and amendments would align California's GHG emission standards and test procedures with those of the federal Phase 2 GHG regulations in structure, timing, and stringency, providing nationwide consistency for engine and vehicle manufacturers. There would be some minor differences between the California Phase 2 regulations and the federal Phase 2 regulations necessary to ease enforcement, align with existing California programs to preserve the benefits of California incentive programs and regulations, and provide incentives to bring low-emission technologies to market.

Summary: Staff will present for Board consideration a proposed rulemaking that will adopt prohibitions on use of certain hydrofluorocarbons (HFCs) in stationary refrigeration and foams end uses. California will later propose for Board consideration other measures to reduce HFCs as part of California’s Short Lived Climate Pollutant Strategy in the second part of this two-part rulemaking. The focus of this first rulemaking proposal is to preserve the federal Significant New Alternatives Policy (SNAP) Rules for certain end uses, which are in jeopardy due to a recent D.C. Circuit Court of Appeals decision that vacated the federal SNAP Rule to the extent it requires the replacement of certain HFCs with low-global warming potential alternatives.

SCHEDULE B: PROPOSED REGULATIONS IMPLEMENTING STATUTES ENACTED PRIOR TO THE YEAR 2017

Subject: Proposed Amendments to the California Emission Control System Warranty Regulations for On-Road Heavy-Duty Vehicles with Gross Vehicle Weight Ratings Greater than 14,000 lbs.		CCR Title & Sections Affected: Title 13, §§ 2035, 2036, 2040, and incorporated Heavy-duty Diesel and Otto-cycle Test Procedures		Statute(s) Being Implemented: Health & Saf. Code §§ 38501, 38505, 38510, 38560, 39500, 39600, 39601, 43000, 43013, 43018, 43100, 43101, 43102, 43104, 43105, 43106, 43806, and 43204 – 43205.5

		Notice Published: 4/6/2018	Public Hearing: 5/24/2018	Approval by CARB: 3/5/2019	To OAL for review: 4/5/2019
Summary: Staff will present for Board consideration amendments to the emissions control system warranty regulations applicable to on-road heavy-duty vehicles and engines. The proposed emission control system warranty amendments would lengthen existing warranty periods to better reflect the longevity and usage of modern vehicles, thus better ensuring that any defects that cause engines or vehicles to fail to conform to applicable emissions requirements are repaired at no additional cost to the consumer. Additionally, the amendments would update maintenance provisions to ensure the efficacy of the lengthened warranty period requirements by better reflecting current industry practices with respect to minimum service intervals, and to better align with federal provisions. Staff will also propose to update the definition of a warranted part by utilizing the current relationship between a warranted part and illumination of the vehicle’s on-board diagnostic system’s malfunction indicator lamp instead of using an out-of-date 1985 warranty parts list.

		Notice Published: 6/8/2018	Public Hearing: 7/26/2018	Approval by CARB: 5/7/2019	To OAL for review: 6/7/2019		
Summary: Staff will present for Board consideration a proposal to amend the vapor recovery regulations for existing gasoline dispensing facilities with aboveground storage tanks (AST). In 2008, CARB adopted regulations requiring existing ASTs to upgrade vapor recovery systems associated with the transfer of gasoline into motor vehicles (Phase II operations). Staff recalculated the cost effectiveness based on actual costs and found that implementing the adopted regulations is more costly than anticipated in 2008. CARB staff is proposing to require a smaller number of ASTs than originally thought to upgrade their Phase II systems.

SCHEDULE A: PROPOSED REGULATIONS IMPLEMENTING STATUTES ENACTED DURING THE YEAR 2017

Subject: Smog Check Exemption		CCR Title & Sections Affected: Title 16, §§ 3340.17		Statute(s) Being Implemented: Health and Safety Code §§ 44011, 44060, 44060.5, & 44091.1	
Responsible Agency Unit: Bureau of Automotive Repair	Contact Person & Phone Number: Sergy (Esam) El-Morshedy, (916) 403-8534	Projected Dates:			
		Notice Published: July 2018	Public Hearing: Aug 2018	Adoption by your agency: Jan 1, 2019	To OAL for review: Nov 2018
<p>This proposed regulation would amend California Code of Regulations (CCR) Title 16, Section 3340.17, Subdivision (a), wherein the BAR-97 Emission Inspection System (EIS) Specifications is incorporated by reference. The BAR-97 EIS Specifications is a reference document containing the design guidelines and performance criteria for the equipment used in shops licensed to test and/or repair vehicles subject to California's Enhanced Inspection and Maintenance (I/M) Program.</p> <p>This proposed regulation has been placed in the 2018 Schedule A as a result of Assembly Bill (AB) 1274 (O'Donnell, Statutes of 2017, Chapter 633), which amended the Health and Safety Code to extend the current 6-year exemption for new vehicles from the state's biennial Smog Check requirement for reregistration with the Department of Motor Vehicles (DMV) to include 7- and 8-model year vehicles. This proposal shall be submitted as a change without regulatory affect, as its purpose is to make "...a regulatory provision consistent with a changed California statute." (CCR Title 1, Section 100(a)(6)).</p> <p>The BAR-97 EIS Specifications document is also being updated as part of the "Smog Check Inspection Equipment, Procedures, and Reference Documents" regulatory proposal which was noticed to the public on December 29, 2017. That proposal is included on the 2018 Rulemaking Schedule B, and updates the BAR-97 EIS Specifications to clarify and document existing inspection procedures, and requires Smog Check stations to use an Internet connection from their BAR-97 EIS to BAR's central database in lieu of a traditional phone line. Each rulemaking change must be filed separately because the Schedule B proposal amends the document to add technical prompts identifying the existing exemption for vehicles 6-years or newer. That information is valid and shall remain in place until the exemption for 7- and 8-model year vehicles takes effect on January 1, 2019.</p>

In addition, most relocation rules became effective over two decades ago and have not been updated to remove archaic language (vouchers, telegrams, etc.) or reflect current rates (Federal Standard Mileage Rate, etc.) and/or policy (defines “incidentals” instead of referring to current Internal Revenue Service definition, etc.).
